

Project	Specification
Brand	Kllisre
Interface Type	288 Pin Unbuffered DIMM Non ECC
Frequency	2133/2400/2666
Type	DDR4
Memory Voltage	1.2V
Application	Desktop
Warranty Time	Three Years
The value of CL	2400=CL17
Original Chips	For HY SEC MIC...

Kllisre memory

Rapid response
Defeat the opponent

Transfer large files
Faster transfer speed

**Running large games
Reduced response time**

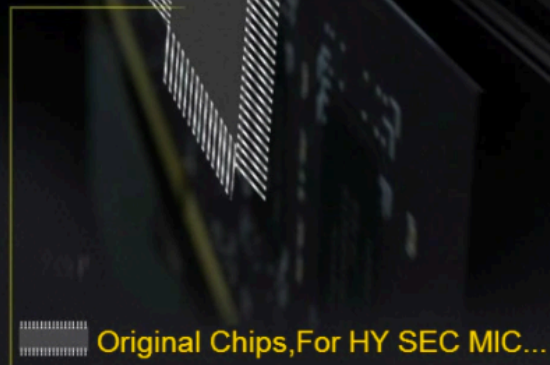

**Running design software
Smoother operation**

Original Chips

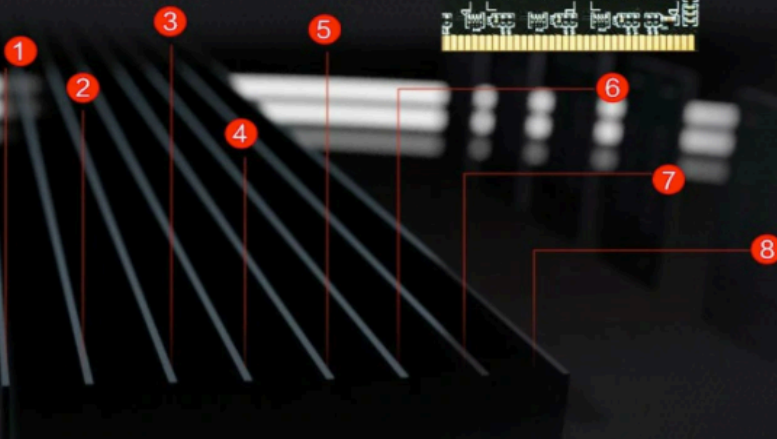

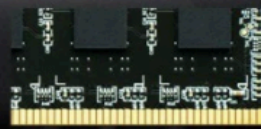

Selection of high quality components

Kilisre

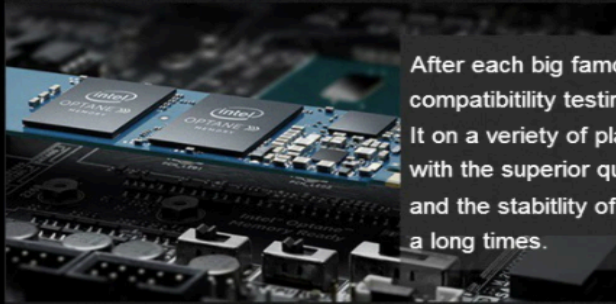

Selective particles

8 layer PCB

Perfect compatibility,easy use

After each big famous brand motherboard compatibility testing, strong compatibility, high stability. It on a variety of platforms can provide you with the superior quality of memory, and the stability of the system operation needed for a long time.

Excellent Quality

All modules are tested at each stage of production to ensure the highest quality
